

CONNECTALL

Why depend on an operator's network when you can have your own telephony network?

ConnectAll is a VoIP PBX Solution targeted towards small to medium-sized organisations as well as the consumer market. This customizable solution does not involve any external network and fits in even the most complex of premises and caters to all in-bound and out-bound calling through a single telephone set. It is a gateway to a multitude of features and is an advanced yet simple-to-use call-handling facility.

The Product

ConnectAll is a **simple-to-use telephony network** which affixes smart-calling features to telephone sets placed at customers' premises. ConnectAll turns generic telephone extensions into magical gadgets that integrate with different spots in the location. The smart ConnectAll extensions handle phone calls customized to the user's desires and needs.

Features

- CALL RECORDING
- CALL TRANSFER
- CALL WAITING
- CALLER ID (MONITORING, BLOCKING, ON-CALL WAITING)
- PERSONALIZED VOICEMAIL FOR MAILBOX
- IVR

Unique Benefits

MOBILITY

Move around within your premises using Wi-Fi connectivity and soft phone or using Wi-Fi enabled SIP Phones. Furthermore, if your cell phone/smart phone has a SIP Client feature and Wi-Fi connectivity, then it can also be used as your VoIP Phone Extension. Roam around within the hot spot of Wi-Fi and stay connected with your personal extension.

Service Positioning

PREMISE SURVEY

ConnectAll is about spoiling users with a smart telephony network and establishing comfort of communication across the premises. We do not simply install the solution for you; we plan and roll out a smart network.
